PROFILE

Motivated and tech-savvy BCA student passionate about solving real-world problem with code. Focused on time management, responsive web development, and creating helpful tools for students. Eager to grow as a full-stack developer. Always curious and committed to continuous learning.

CAREER OBJECTIVE

To become a skilled and versatile full-stack developer by continuously learning and applying technologies like HTML, CSS, JavaScript, Bootstrap, React, and backend frameworks. I am passionate about building impactful, real-world solutions and aspire to grow in the tech industry by contributing to innovative projects and staying updated with the latest technological advancements.

PROJECT: CODy - The Student Companion

Problem: Many students face difficulty managing their studies, time, and finding academic support — especially those with financial challenges.

Solution: CODy is a responsive web application created to support students with:

- Assignment upload & tracking
- Time management planner
- Academic tips and important questions
- A supportive and inspiring environment

Impact: CODy enhances the overall study experience by helping students stay organized, motivated, and on track.
